

## Fantuzzi Parts

The Italian Fantuzzi Group offers an abundance of material handling equipment and heavy machinery. The equipment consists of numerous equipment focused on loading, unloading and transporting goods. The railway freight industry and the port market need a big portion of their equipment.

Initially beginning in the 1960s as a zoo-technical and agricultural equipment manufacturer in the province of Reggio Emilia, Fantuzzi has grown to become a global leader in the heavy equipment industry. Now a global firm, the company gradually expanded after introducing successful advancements and overcoming a large number of technological challenges. Luciano Fantuzzi is the President and founder of the group. In 1967, the group began producing side lift trucks specifically for transporting timber and extended materials such as metal rods that weighed between three to five tonnes. The company enjoyed frequent orders and completed sixty units in the second year; which was five times greater than their 1st year sales.

Within a short amount of time, the firm took off exponentially. In 1968, a heavy-duty side-loader British model that was capable of lifting up to 32 tonnes inspired Luciano Fantuzzi. He wanted to create something that had more power with a similar style. After finishing this machine and attaining his goal, Luciano began receiving orders from French Railways, Fiat and many others. Nowadays, the Fantuzzi Group Italy has a plethora of manufacturing plants around the globe including Italy, Germany and China. The company proudly exports to 162 countries.

Fantuzzi has generously offered its patented knowledge with nations all over the globe with the goal of making the material handling, heavy equipment and transportation industries more efficient. Advancements and digital technology are serving to transform the industry.
